Meet Lucy!

We're delighted to introduce Lucy to you as part of the Gaia Education team as a STEM and interest-based educator.

Biology, Chemistry, Physics & Maths
Interest-based learning

Lucy loves teaching Maths and Science, with a particular passion for Biology and ecology. She enjoys everything to do with the environment, animals and plants. A lifelong curiosity about how things work drew her to these subjects, and she loves sharing that enthusiasm with her learners.

Before joining Gaia, Lucy taught in mainstream secondary schools for 15 years, then worked in alternative provision and tutoring. She has specialised in supporting children with special educational needs and disabilities (SEND).

Helping young people reconnect with learning is hugely rewarding for Lucy. She enjoys discovering their interests and learning alongside them: "I think I've learnt almost as much as I've taught."

At home, Lucy has two children and a rather grumpy cat called Pixy. She gets out into nature whenever she can, whether for a run (or a slow jog!), a beach trip to explore rock pools and hunt for fossils, or time on the water with her paddleboard.
