Meet Sundus!

We're delighted to introduce Sundus to you as part of the Gaia Education team as a Mathematics Educator.

Mathematics Educator

Sundus joined Gaia in January '26 after 10 years of working as a maths teacher. She has taught in different schools across London and later moved into tutoring, where she discovered how much she valued being able to give learners more individual support.

Sundus has always been passionate about making a difference to children who may find it difficult to have their needs fully met in a classroom of over 30 pupils. For her, teaching has never just been about maths. It's about helping learners build confidence, feel understood and recognise what they're capable of.

This is why Gaia feels like such a great fit for Sundus. She believes that, together, the team is making a difference to the young people they support.

Outside teaching, Sundus enjoys reading, crocheting, henna art and occasionally creating balloon décor for friends and family. Most of her free time is spent with her two sons, and they particularly enjoy watching and discussing films and TV shows together.
