Meet Victoria!

We're delighted to introduce Victoria to you as part of the Gaia Learning team as an Educator.

1:1 Interest Based Sessions
Functional Skills English, Art
& Executive Functioning Educator

Victoria joined Gaia Learning in 2023 and has worked in education since 2000. Her journey began as a teaching assistant at the National Student Leadership Conference at American University, supporting high school students.

Teaching in Ghana in 2001 sparked her passion for teaching English as an additional language. She went on to teach in Korea, Thailand and Saudi Arabia before continuing her work in UK colleges. She later moved into online teaching as a freelancer before becoming a permanent educator at Gaia.

Victoria's international experience, CELTA training and TQUK Level 2 Certificate in Understanding Autism, completed in 2023, inform her flexible, inclusive approach. She values the ideas and experiences each learner brings and enjoys giving them opportunities to become the expert and teach her something new.

At Gaia, Victoria focuses on building trusting relationships and helping neurodivergent learners feel comfortable, understood and confident in their abilities. She adapts sessions around their interests, strengths and individual needs, making space for different ways of communicating and participating. Through creative projects, practical activities and shared discussions, she helps learners build confidence, explore new ideas and recognise their progress at their own pace.

Outside work, Victoria loves baking and settling down with a good TV show, especially The Traitors. She is also a big fan of Halloween and enjoys any opportunity to bring a little spooky creativity into her day!
